PMA Max. Allowable Pressure	<b>150 PSIG up to 350° F</b>
TMA Max. Allowable Temperature	<b>353° F @ 150 PSIG</b>

### TYPICAL APPLICATION

The **AV813W** Air Eliminator is used for the removal of air and other gases from vessels or piping systems without allowing the contained liquid to escape.

### HOW IT WORKS

The valve and seat assembly inside the air eliminator is connected to a stainless steel float. When there is no liquid in the body of the air eliminator, the float will be in the down position allowing air or other gases in the vessel or piping system to escape. When liquid enters the body, it will lift the float and the valve will be closed off before any liquid can escape.

### FEATURES

- Rugged cast iron housing
- Simple design for easy maintenance
- Stainless steel internals
- Viton Valve head for high temperatures & Tight shut-off

### SAMPLE SPECIFICATION

Air Eliminator shall be of cast iron construction with stainless steel internals and soft Viton seat for elevated temperatures and tight shut-off.

### INSTALLATION & MAINTENANCE

The AV813W should be located at a high point in the system or vessel. The unit must be installed level and upright with flow upward for the float mechanism to operate properly. Isolation valves should be installed for ease of maintenance.
